Professional Summary

- 10+ years of software development & last 5+ years of experience in leading Agile teams that built reliable, scalable SaaS products from MVP to early growth stages, Products that have seen >\$2M ARR & Scalable infrastructure with >1M I/O per month.
- Built modern tech infrastructures based on Serverless, JAMStack using ReactJS, Redux, NodeJS, MongoDB, Gatsby, NextJS & modern mobile apps using Flutter, Native Android, Native iOS, and voice apps on Amazon Alexa & Google Assistant.
- Proven experience of transforming ideas into delightful user experiences by performing an in-depth study of stakeholder's and user's needs which in turn, helps me to build the sustainable team and tech infrastructure.
- Have created/transformed existing teams (by establishing workflows that enhance productivity) in such a way that the team keeps progressing even in my absence.
- Hands-on coding experience in Full-stack Web, Full-stack Mobile, Full-stack Voice apps.

Work experience

CTO & Co-Founder

OYKU Tech, Inc - Bangalore – (Oct 2018 - Apr 2021) - 2+ Years

- Built and managed entire infrastructure from scratch to delivery, including mobile applications auto-generation & voice apps. Involved in all aspects of product strategy and executions.
- Efficient cloud strategy resulting in <\$10 backend for 1M+ I/O per month.
- Successfully launched 2 Voice app products and 1 SaaS Product with a No-Code app builder.
- Built an effective tech infrastructure that runs around the clock without ever worry about scaling and downtime. Scalable yet cost-effective.
- Established customer-centric product management, where customer data drives the roadmap.
- Developed the team to establish technical credibility as 4+ person company servicing podcasters around the world. Brought the SaaS product up fully functional from concept to operational in 4 months with 4 members team.
- Accelerated user onboarding speed by designing and implementing an effective onboarding. (From 15-20 mins onboarding, brought down to 2-3 mins)
- Led the architecting effort to reduce deployment time, by automating with CI/CD pipelines.
- Led the products to win Competitions, Hackathons and online Tournaments that resulted in monetary rewards and Remote Accelerator funding.

👉 **Tech Stack:** React, Redux, Material UI, Gatsby.js, Node.js, AWS Services (Notably S3, CloudFront, EC2, RDS, Lambda, SAM, CloudFormation, DynamoDB) MongoDB, Mongoose, Postgres, JWT, OAS 3.0, GitLab CI/CD, Android, iOS, Alexa, Google Assistant, Firebase.

Internal Tooling: JIRA, Slack, Airtable, Google Office Suite, Notion, Intercom, Kampsite

3rd Party Integrations: Stripe, Sentry, Slack, Airtable, Google Sheets, Patreon, Intercom, MailChimp

Engineering Manager & Innovation Lead [Founding Team Member]

Abaqus, Inc - Bangalore – (Feb 2012 - Aug 2018) - 6+ Years

- Founding engineer & helped revenue growth to \$2M ARR. While leaving, I was the Engineering Manager with hands-on coding.
- Helped with driving innovation. Oversaw the implementation of Agile & Lean methodologies implementation. Introduced process and frameworks in product development to help build innovative, technology-driven environment and culture.
- Led transition to the modern tools and technologies and in-house SDK developments. Trained the team for the transition.
- Ensured HIPPA compliance throughout the roadmap implementation.
- Accelerated user onboarding speed by designing an effective onboarding. (From 30-45 mins onboarding, brought down to 10-20 mins)
- Implemented and guided the team on analytics-driven approach for product roadmap prioritisation.
- Designed and implemented the push notification server in-house (using GCM and APNS behind the scene) that saved thousands of dollars per year for the company.
- Helped to scale the tech infrastructure of a 3 person team to 10+.

👉 **Tech Stack:** Android, iOS, Firebase, Javascript, Material UI, Java, Java Spring, PayPal API's, Crashlytics, Pendo, GCM, APNS

Internal Tooling: JIRA, Slack, Zeplin, Google Office Suite, Sketch, InVision, StatusHero

Android Developer [Founding Team Member]

Petalflame Innovative Tech Pvt Ltd - Bangalore – (Aug 2011 - Jan 2012) - 6 Months

- Worked directly with the CEO. Contributed to the development of 'Social feeds integrated home screen' application in Android.

👉 **Tech Stack:** Android, Facebook Graph API

Android Development Intern

MindTree Pvt Ltd - Chennai – (Oct 2010 - Jan 2011) - 4 Months

- Contributed to the 4 member team to develop Cloud File Sharing application in Android. Responsible for reporting and presenting on behalf of the team.

👉 **Tech Stack:** Android, Javascript

Consulting & Freelance

Technology Consultant at **Cashkumar** - (Sep 2018 - Jan 2019) - 5 Months - **100k+ Downloads**

- Led the architecting effort of Mobile apps, developed and delivered 2 apps in 4 months, reduced no.of app updates by implementing remote configuration strategy.
- Built technology & process which reduced the no.of dev resource to maintain the apps. Literally zero-touch for months together after I left.

Technology Consultant at **Abaqus Inc** - (Sep 2018 - Feb 2019) - 6 Months

- Saved thousands of dollars for the company by bringing the major 3rd party integrations developed as internal SDKs.
- Developed release cycle management process and which is successfully followed. Implemented better approach to manage the QA & release efforts while still taking care of the tech support & debugging efforts.
